

Before You Begin...

Before continuing, you need to deselect the Acrobat® default preference “[Open Cross-Documents Links in Same Window.](#)” If you skip this step, each time you close a paper you will have to go back to the beginning of the CD to get to the Table of Contents or Index from which you started. To save yourself time, please take a few seconds now to complete this one-time step.

From the Menu bar at the top of your screen, select:

1. Edit
2. Preferences
3. General
4. Options

to turn the check box **OFF** next to the “[Open Cross-Documents Links in Same Window](#)”

For new Adobe® Acrobat® users, we advise you to go to the section called “[How to use this CD](#)” found in the Main Menu. It is designed to give you a quick overview of the Acrobat® program and how it works, to make using this CD-ROM easier.
